Powerball Jackpot at \$485 Million for Wednesday

(Madison) — Lottery players have a chance to win an estimated \$485 million (or \$327.7 million cash) jackpot in Wednesday night's Powerball drawing.

Players should sign their ticket when they purchase it – and then check their ticket as soon as possible after the drawing to see if they've won a prize. Although there was not a jackpot winner from Saturday's Powerball drawing, there were more than two million other winners in with prizes ranging from \$4 up to \$2 million.

Wednesday night's \$485 million Powerball jackpot is the highest since May 2013 and the third highest Powerball jackpot in the game's history.

The odds of winning the Powerball jackpot are approximately 1:175.3 million.
